Zone 2

Moderately hard

SOMETIMES KNOWN AS:
Threshold training, intensive endurance, etc.

SUBJECTIVE FEEL:
You know you've had a workout!

TYPICAL BLOOD LACTATE:
Between 2 and 4mmol per litre (mM/L)

Zone 1

Easy

SOMETIMES KNOWN AS:
Aerobic, Easy, Recovery, Long slow distance, etc.

SUBJECTIVE FEEL:
You feel like you can keep going and going

TYPICAL BLOOD LACTATE:
Less than 2mmol per litre (mM/L)

AM I GROUP 1 or GROUP 2	LONG RUNS	TRACK SESSION	SPEED SESSION	STEADY RUN	WHAT IS PAARLAUF	WHAT IS GROUP FARTLEK	TRAIL/CROSS COUNTRY RUN
Group 1: 5k in 25 mins plus Group 2: 5k in sub-25 mins	Steady or easy pace effort should not feel hard but build up endurance, ability to keep going. Good prep for longer races and cross country season.	Track sessions are for everyone They are different to the speed sessions on a Tuesday as they are based on distance where as Tuesdays sessions are based on time. Even though this is a group session you are in control of your own speed, there is no need to keep up with anyone else.	Try and maintain the same pace throughout the session, so make sure the pace you start at you are able to maintain for the whole session. Please use recovery times to regroup. Once 'Aerobic Speed Workout' sessions have been completed cool down. Group 1 for at least 1 mile Group	Try to maintain a regular pace where a 2 word conversation is possible. The number of words you can say whilst running indicate the intensity of your running. Holding a conversation = easy to steady pace (used for longer runs); 3 words max = running at 5k - 10k pace; 1 word / no words = 3k pace - max effort.	In groups of 3 (of similar pace), select 2 points to run between. Runner 1 & 3 at 1st point and Runner 2 at 2nd. Runner 1 runs to point 2 Runner 2 runs to point 1 Runner 3 runs to point 2 Runner 1 runs to point 1 Runner 2 runs to point 2 Runner 3 runs to point 1 Then repeat the cycle for the	A Fartlek session is NOT a speed session! In a group of similar pace runners, start your STEADY RUN at your usual pace, once you have arrived at the location where you are to start your Fartlek session use trees, lampposts etc. as interval markers, with bursts of speed returning to your STEADY RUN pace for similar periods/distance of	A trail/cross country run is different to running on a flat pavement, as well as increasing variety it improves balance and co-ordination. As well as stopping INTENSITY LEVEL Training at different intensity levels develops different systems within the body that you'll use during the various stages of a race. See
